For the prevention and cure of
BILIOUS AND MALIGNANT FEVERS
is recommended
HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompeus eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

THE INDIAMAN.

It ever has been, and ever will be, the fate of those who devote their time, their fortune, or their talents, to making discoveries and improvements in science or the economy of life, or in tracing out new paths for scientific research, or commercial enterprise and adventure, to experience the opposition of the interested, the calumnies of the malicious, and the sneering animadversions of the ignorant and illiberal; and but for the buoyant spirit, which ever enables true genius to rise superior to such opposing obstacles, that light with which the brilliant genius of a Gioia, a Newton, a Columbus, or a Fulton, has irradiated the world, would never have shown upon mankind. This continent, the favorite resting place of liberty, the asylum of oppressed humanity, where flourishes in an eminent degree those arts and sciences which are the pride and boast of the old world, where the science of civil government and the principles of civil and religious liberty are not only better understood, but more successfully practised than in any part of the habitable globe, would now have known the impress of no footstep but that of the savage aborigines, and the beasts which it is his employment to pursue.—Commerce and navigation, instead of uniting in the bonds of social intercourse and the ties of reciprocal obligations and benefits the most distant parts of the world, would now have been confined to the narrow seas and to the coasts of the old world. These remarks will apply with equal force to those who attempt to divert men from pursuits to which they have become attached from habit, and to lead them into others, although their interests may be in every way promoted by the change.

The science of commerce, like that of chymistry, may be said to be imperfectible, and time and adventure must continue to develope for it new channels, and to shed on it new lights. It is generally admitted that the application of a known principle in a new way, or under new circumstances and associations, is in its degree as meritorious as its invention, and claims equally the support and countenance of society. The attempt of some enterprising individuals in our community to establish, for the first time, a vessel in the direct trade from this port to the China seas, has given rise to various speculations, and various opinions prevail as to its probable effect on the interests of the town and the individual adventurers; for it must be known that, with us, whatever is the business of *one man* is considered by our pragmatical citizens as the business of *every man*, by implication. Some are of opinion that, having done *very well* without such trade heretofore, we have no need of it at all, and that the attempt exceeds our means. Others admit that the trade has been generally lucrative, but of late has been unprofitable even to the eastern merchant, who, they say, sails his vessel at 20 per cent. less than we can, and that inevitable disaster must be the fate of those who have the temerity to attempt so bold an innovation on the long established system of Yankee monopoly and southern dependence. But the grand consideration, in which all others appear to be swallowed up, is the alarming, the terrifying drain which it is to cause of specie from our banks, threatening, as our panic struck citizens suppose, their very existence, and rendering heavy curtailments necessary to avert impending destruction. Some even turn pale from the apprehension of never again beholding the cheering sight of a silver dollar, and at the horrible prospect of the return of the rag system with all its attendant calamities. An attempt to dissipate this gloom, to calm the fears, and sooth the feelings in this state of alarm and despondence, would be justified by the benevolence of the intention, if not by its success. The holders of the first opinion are of that order of persons whose invincible and apothetical aversion to change is such, that had Providence placed them among the savage rovers of our western wilds, they could never have been induced by all the allurements of civilized life to exchange the buffalo and deer skin for a broad cloth surtout, a leg of barbecued bear meat for all the delicacies which the most luxurious taste could select, or the war songs and traditions of their native woods for the rational pleasures and enjoyments of cultivated intellect, and the reciprocal courtesies of polished society. On such, arguments are lost, or answered by the general assertion, that as their animal wants have been thus far satisfied by what is now within their reach, further exertion is unnecessary. Those of the second class are prepared to assert that what others have accidentally failed in we must not attempt—they would abandon the mines of Potosi, because one miner had been buried in the first excavation, or the ocean, because one ship had foundered on its bosom. But they have not with them even this argument against the attempt in question; for the India trade, although at times unprofitable, is in the aggregate unquestionably a lucrative one to the individuals engaged in it, and enables the cities where it is most extensively carried on to render all the rest of the country constantly tributary to them. That the first adventure may yield but a small remuneration to the individual for his risk and labor is more than probable; because the forming of correspondents, adapting orders to the particular wants of the market, and the minor arrangements for the permanent prosecution of the trade, must be done at the expense of the profits of the first effort. Further than this, it cannot be said that we labor under any physical disadvantages peculiar to our local situation; and so far is the circumstance above mentioned from justifying us in discouraging the attempt, that it is the best possible reason why we should do all in our power to foster and encourage the efforts of those who are thus magnanimously prepared to risk their capital under all these disadvantages for the permanent good of the town.

The last and principal objection against the India adventure is not only demonstrably incorrect, but its very reverse is the fact—so far from draining the town of specie, it will be the means if extensively and regularly carried on, of giving immense extension and facility to the operations of our banks, and for every thousand dollars of specie now drawn out, the return of the ship will place in our banks two thousand dollars in funds of equal value to them. If, for example, 100,000 dollars is required as an outfit now, the gross sales of the first cargo to the merchants of the district and our western customers, will place in our banks 200,000 dollars, which entire sum will be deducted from the general balance which the eastern towns preserve against us, and from them alone we need fear large demands for specie, and it is from them alone which the embarrassments of our banking operations spring. The money which we pay for produce to the western merchant and farmer is by him taken to them for the purchase of India and European goods, and thus the balance of trade is against us and we in their power. If we now receive from Boston and N. York 230,000 dollars annually, in India and European goods, in payment for flour, when we import these articles direct for ourselves, we shall receive from those places money in their stead or at least so preserve the balance of trade as to render us independent of their attacks—were it otherwise, specie must long since have disappeared from Boston and Salem—whereas no part of the country has been so uniformly independent in this particular: they even export our produce from our own ports and with our own capital, and receive specie and other funds, and finally pay us from their India and other importations with all the accumulations of additional freight, insurance and factors' commissions. In fact their present opulence is a consequence of the natural operation of this very India trade, in the product of which, together with that of Russia, they pay every demand against them, & by the credit on the duties a capital is placed in their hands which they make active by filling the warehouses of their factors here with goods, which our banks through the medium of the credit of the latter, make advances upon, and by means of these very advances which absorb a good portion of their capital, keep themselves in perpetual thraldom to New-England. Is it a thing unknown in our banks, that drafts are drawn on the the east, for flour, which when due are redrawn for, and the operation finally ended here by a shipment of India or Russia goods, or New-England produce? Will it be of no advantage to the town to secure to itself the profits we now pay on these articles and get money for our produce to enable us to buy them? Will it be no advantage that a heavy amount of duties be annually bonded, and the money disbursed for outfits, the labor of mechanics, etc. etc. be expended in town? If it will not, we must come to the paradoxical conclusion that the eastern India merchants and ship owners, have been working for nothing and getting rich by the loss. If the view which I have taken of this subject be correct, I would with respectful deference submit it, to the wisdom of those who compose the councils which wield the force and direct the operations of our monied institutions, how far it behoves them to refrain from rendering this undertaking unpopular by making it the pretext for heavy curtailments, and how far it would be proper and politic in them, having given it their sanction, to make it a common cause among the banks of the town, and each contribute its quota of the money required, without endeavoring to shift the weight on the banks of Georgetown and Washington, (thereby keeping alive a jealousy which unnatural as it may appear does exist) and only insuring the return of the blow with redoubled force on themselves.

It has also been said that there will not be found here a market even for a small cargo of India goods. This *cannot* be the case—there is a natural good sense, a just apprehension of their true interest, a redeeming spirit in the people, which will impel them overtly to silence this assertion, and to step forward to cherish and protect the mode, the legitimate proper mode, of their own town, to make an effort to break the spell which binds us in humble, inert, disgraceful dependence on our eastern neighbors.

For myself I can only say (and in saying it I seperate from the sentiment every thing of personal feeling which might be supposed to induce its expression) that I do most devoutly wish them success in the commencement, and encreasing success in the permanent prosecution of the undertaking. MERCATOR.

FROM OUR CORRESPONDENT AT WASHINGTON.

Saturday, February 14, 1818.

The bill to increase the salaries of some of the judges was yesterday read a second time and referred to a committee of the whole.

A resolution was passed calling on the head of the war department to give his opinion on the propriety of continuing the office of claims for one year from the 9th of April next.

Leave was given to bring in a bill to extend half pay pensions to the widows of soldiers who died in the public service during the late war.

A resolution, proposed on Thursday by Mr. Robertson, to instruct the military committee to enquire into the expediency of educating the sons of military officers & soldiers who fell in the service of the country was brought up, and, as usual, many propositions to amend it were proposed and discussed. They all, however, ended in the adoption of a resolution to the following effect: That in all applications hereafter for admission of cadets into the military academy, a preference shall be given to the sons of the officers and soldiers who fell in the late war, giving a preference to those least able to educate themselves, and best qualified for the military profession, and to be distributed as equally as possible among the states according to the ratio of their population.

The house, resolved into a committee, then took into consideration the bill for establishing an uniform system of bankruptcy, and, after having gone through a portion of it, rose, reported progress, and obtained leave to sit again. After which the house adjourned to Monday.

PROVIDENTIAL PRESERVATION.

It is stated in the Boston Intelligencer that the brig Mary & Eliza, captain Beadle, from Salem, bound to Sumatra, took from the uninhabited part of the island of Trinidad 17 males and 2 females, the passengers and part of the crew of the French ship Jeune Sochie, captain Breman, from Havre de Grace, bound to Bourbon, which ship had taken fire at sea, in consequence as was believed, of having vitriol on board, and on making Trinidad, they had been obliged to run her on shore for the preservation of their lives. The ship's long boat with eight hands had been dispatched to the coast of Brazils for assistance, shortly after they reached the Island, which was about a month previous to their being relieved by captain Beadle—but when the M. and E. left the Island, nothing had been heard of her. Captain Beadle took them all on board, and as much of their baggage as the violence of the surf would permit to be brought off, and landed them at the Cape of Good-Hope, on the 18th of October.

LATEST FROM SOUTH AMERICA

Capt Coleman, arrived here yesterday from Montevieda, furnishes the following interesting intelligence:—

The reports from Chili were very favorable of the success of the Patriots.—Gen. St. Martin was advancing very rapidly towards Lima, while at Buenos Ayres there had arrived a squadron of Portuguese men of war, the commander of which had made a formal demand of the release of two Portuguese East-Indiamen sent there by the schooner General Martin. After some time negociating, and having gone through a regular prize court, they were released without damages. In the intermediate time, the Portuguese captured a privateer brig, after 15 minutes close action, belonging to Buenos Ayres; this so exasperated the government of Buenos Ayres, that it was generally believed they would detain one of the above ships, which was already liberated but had not sailed; but while we were at Montevieda, the above ship, in company with all the Portugese squadron, arrived; but the result was not known amongst the Americans—the prevailing opinion was before these vessels arrived, that war between the Portuguese and Buenos Ayreans would certainly take place. The Portuguese are making great preparations for the defence of Montevieda. They are very closely blockaded by land, by General Artogas, who has taken possession of all the country within three miles of the walls, which makes provisions very scarce and dear.—About the 4th of Dec. touched at Montevieda, a British sloop of war from Rio Janeiro, who informed of an American sloop of war arriving at Rio Janeiro from the United States.

SPANISH REGULATION.

The following particular and authentic account of a recent regulation in the ports of Spain has been received by Mr. Topliff, from his correspondent in Gibraltar.

Copy of a letter from the American Consul at Malaga, to the American Consul at Gibraltar, dated Malaga, 12th November, 1817.

SIR—The Governor of this place has officially communicated to me, that all American vessels calling in at the ports of Spain, will henceforward be subject to a Navigation Duty, as it is so called, of one dollar per ton. None are to be exempted—those that arrive from other ports in Spain, (where the duty has already been paid) windbound, that come to anchor in our bay, and even vessels forced by stress of weather, will be called on for the amount, according to the interpretation of the order by our captain of the port, who is charged with its execution. But no charge will be made of the Tonage Duty, visit, or admission to pratique, anchorage, or light duty, and clearing the mole, or for the Tariffa light, formerly exacted, these items being now all included in the above mentioned Navigation Duty.

As so many of our vessels call in at your port, with the intention of proceeding to the ports of Spain, I have considered it proper to pass to you the information that the Captains may be made acquainted with this new regulation, and, in consequence, act as they consider most conducive to their advantage.

Your's truly.

WM. KIRKPATRICK.

CASE OF MR. MEADE

We have just perused all the documents communicated to congress by the President in the case of Mr. Meade.

By these it appears that Mr. Meade was born in Chester county, Pennsylvania, in June, 1778; that he went to Spain in 1803, to claim restitution of property at Buenos Ayres, in which claim he was unsuccessful; that he then established a commercial house at Cadiz, where he has, since that time resided, and for which port he held the station of navy agent of the United States from the year 1806 to the year 1817. He has a wife and nine children, who at present reside in Philadelphia.

During the war which prevailed in the Peninsula, in consequence of the French invasion by Napoleon, Mr. Meade entered into large contracts with the Spanish authorities, to furnish supplies, and was at one period, in advance to them nearly 600,000 dollars. The government of Spain was still largely indebted to him, when in 1811, he was appointed assignee to the estate of James W. Glass, of Cadiz, who had been declared bankrupt in England, in consequence of his connexion with the House of Hunter, Rainey & Co. of London, against whom a commission of bankruptcy had issued.

Having settled all the affairs of the particular estate of Glass, there remained in Mr. Meade's hands about $52,000. By an order of the tribunal of commerce at Cadiz, to which he was, as an agent responsible, he was directed to pay this sum into the king's treasury. John Mc Dermot as agent for Hunter, one of the English Bankrupts, nevertheless brought suit against Mr. Meade for the same 52,000 dollars—and upon failure to pay them, and an allegation that he was about to leave Spain, Meade was, by direction of the same tribunal, sent to prison, where he has remained ever since.

The real secret of the transaction is simply this: Mr. Meade held securities of the Spanish government for money due to him upon his former contracts and it was in these securities, and not out of the actual funds of the estate of which he was the assignee, that he made the payment of the 52,000 dollars into the royal treasury. But the treasurer had acknowledged, by his official receipt, the payment was equivalent to specie, and that he would be answerable for the amount in specie, to the order of the tribunal of commerce.

McDermot as the agent of Hunter, is not willing to accept Spanish government securities in lieu of the 52,000 cash remaining in Meade's hands as assignee of Glass, and the government of Spain not being able to pay its debt to Meade, they keep him in prison to satisfy the British agent. Upon the whole therefore, it is obvious that the Spanish authorities detain Mr. Meade on account of the insolvency of their own public treasury, and transfer to him a responsibility which properly belongs to the royal treasurer, who is one of their own officers. Castillian pride will not permit the Spanish ministry to acknowledge the paucity of their funds, and in the correspondence with Mr Erving, our minister at Madrid, they shuffle him off upon various pretexts, very disgraceful to the dignity of his catholic majesty.

Among the documents relating to Mr. Meade, we find the following which does not appear to have the least connection with the subject. How it got there we know not—but it is evidently *astray*.—We are glad by the way, to see it, because it marks a spirit and firmness in our government that are highly commendable:

MR. ERVING TO MR. CEVALLOS.

Madrid, Oct. 25, 1816.

To his excellency Don Pedro Cevallos, first Secretary of State, &c.

SIR—By your excellency's note of the 17th inst. in reply to mine of Sept. 26, respecting the proclamation blockade of General Morillo, and the ravages on the American commerce which are committing under it, I am told that his majesty has ordered that information shall be taken (*se pida informe*) of the tribunal of admiralty.

That General Morillo, has issued such a proclamation as I have described in my note of September 26th, is a fact, of universal notoriety—your excellency has had before you, long since, the correspondence between the American secretary of state, and Mr. Onis on the subject, and I have transmitted to you a copy of the letter of Don Francisco Montalvo, vice roy of Santa Fe, to the American commissioner, Mr Hughes, in which the existence of the blockade is admitted, and in which the American government is referred for redress to his catholic majesty. It was therefore that, by the orders of my government, I wrote to you on the subject. With the fact which I have above stated before you, I am wholly at a loss to imagine what kind of information the tribunal of admiralty can afford, which may regulate the decision of his majesty on the subject.

The tribunal cannot deny the existence of the proclamation; it cannot shew that the proclamation is legal—it cannot deny that American vessels have been taken under the proclamation, it cannot contest the right of the American government to demand the restitution of such vessels.

In fine, sir, it is my duty to assure you, that any demur or delay in affording the satisfaction demanded in a case of this principal importance, cannot but be very sensibly felt by the government of the United States.

I renew to you assurances of the very distinguished consideration with which I am yours, &c.

G. W. ERVING.

Storming of the Castle by Cavalry and Infantry.

Selim's party is about to cross the draw bridge, when it is suddenly hoisted by Blue Beard's soldiery. They retire and make an effort to force the Portcullis, in which they succeed; and the HORSES, KNEELING, enter into the castle A *General Combat, horse and foot.* One of Selim's party heroically mounts the draw bridge, which before impeded their efforts, and gallantly cuts it down, which gives an opportunity for his company to pass, *and the horses to ascend.* In the course of the bustle, are several SINGLE COMBATS between the knights on Horse and Foot—the various DEATHS OF THE HORSES, and the final OVERTHROW OF BLUE BEARD.

Valuable Land for Sale.

THE subscriber wishes to sell two valuable Tracts of Land—one situated in the upper part of Fairfax county, adjoining the lands of Samuel G. Griffith, and bounded north by the Potomac river, containing 700 acres, about one half in wood; of the cleared land a considerable proportion is first river bottom, equal in fertility to any in Virginia: the upland is well situated for farming and of a good quality. There is also a mill seat on the Tract of considerable value. This farm is worth the attention of any person wishing to engage in the farming business, as it certainly is not exceeded by any in the county (perhaps state) as a farm of profit, and may be had on reasonable terms. Mr. John Bickaler, who resides near the land, will shew it, and Mr. Wm. M'Carty of Loudoun county, or Mr. John W. Bronaugh of Georgetown, D. C. will make known the terms. If this Tract is not disposed of before the 2nd of MARCH, it will then be exposed to PUBLIC SALE, at Wiley's Tavern, on the road leading from Alexandria to Leesburg.

The other Tract contains 1000 acres, and is the upper and most valuable part of the Tract I live on. It is situated ten miles below Alexandria, and bounded N. by Accotink creek. This Tract will be divided to suit purchasers, if found necessary. Persons wishing to purchase will apply to the subscriber living at Cedar Grove, who will shew the land and make known the terms.

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from *LEE's MEDICINE STORE,* No. 46, Maiden lane, New-York, a fresh supply of the following valuable MEDICINES:

Hamilton's Worm-destroying Lozenges,

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly gratifying to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH,* this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Nervous Disorders	Violent cramps in the stomach and back
Consumptions	Indigestion
Lowness of spirits	Melancholy
Loss of appetite	Gout in the stomach
Impurity of blood	Pains in the limbs
Hysteric'l affection	Relaxations, etc.
Inward weaknesses and debility	

Hamilton's Essence and Extract of Mustard,

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout, palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety by pregnant women, or on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

Hahn's true & genuine German Corn Plaister.

An infallible remedy for corns, speedily removing them root and branch, without giving any pain.

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c.

Hahn's genuine Eye Water,

A sovereign remedy for all diseases of the eyes, whether the effect of natural weakness or of accident.

Tooth Ache Drops.

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

Lee's Infallible Ague and Fever Drops

For the cure of agues, remittent and intermittent fevers.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement.
